PRESIDENT -WAYNE PERRY president@milehirc.com

I want to wish a HAPPY BIRTHDAY to all members who have a birthday this month!

This month is our Open House Aug 20th, I would like to see all our members come out to the event. Join in o fun and meet new people.

If you have questions or ideas on the event please contact me!

VICE PRESIDENT -DAN BLANCO

It has been a very hot summer, but none the less we have managed to get some activities behind us.

Last weekend I had the good pleasure to participate in the Mustang Wings & Wheels Showcase hosted by the Exploration of Flight museum. If you haven't had the opportunity to visit this museum is a must, to see all the planes coming in and you can also try your hand at the simulators they have. You never know what will land on a particular day including old war jet planes.

vp@milehirc.com

Another benefit of attending events like this one is the exposure we can give to the club. It seems that out of last weekend's event have some folks interested in attending our open house.

If you ever have the chance to visit the museum don't hesitate to go, especially on Breakfast week-ends.

As always, my gratitude for those that are willing and able to participate on events and club activities, like making sure the field is always ready and presentable for flying. The work we all put in makes all the difference.

SECRETARY –ADAM BRYANT secretary@milehirc.com

The Museum of WWII Aviation in Colorado is having an airshow in two months, and it is a can't-miss show!

Due to COVID, they have skipped the last couple of years, but the previous show was amaz-ing! They pull out pretty much every airplane from the museum and fly them, plus there will be par-atroopers, aerobatic demos, an F-35 demo, and an F-35 and P-38 heritage flight, **plus lots more!**

The website is here https://www.pprairshow.org/. If you like the WWII big iron, this is the place to be!

One more thing for the newsletter. RTL Fasteners has an eBay store! You can just go to ebay.com and search for "RTL Fasteners" and find every manner of screw, bolt, nut, washer, and related tool you could possibly need at bulk prices. I support our local hobby stores but can't see paying several dollars for six bolts.

TREASURER– NORM BERG

treasurer@milehirc.com

LATEST TRANSACTIONS:

Debit Card		17.87	Additional Keys 2 sets
5046	Bernie Olson	48.97	Gas for Mower
5047	Norman Berger	23.72	Security Sofrware License Akeeba
5048	Premier Portables	75.00	

We presently have 35 members on our roster. History tells us we will lose a few as we renew next month. We are not attracting new members and the current membership is aging too!

If you have ideas to turn this trend around I'm sure everyone will be listening.

We start the renewal process during September.

Dues are now $100.00 for all. Voluntary amount $125.00 to help maintain our treasury and avoid future increases.

We kick off with a meeting where we nominate and elect our officers. The current slate of officers have said they will not be standing for reelection and been in place for about 5 years now and are ready to have you take over.

If you are interested in running for office please let our current president Wayne Perry know

president@milehirc.com

Officer positions:

President, Vice President, Secretary, Treasurer, Safety Officer

August meeting will be at the Open House on August 20th.

September Meeting will be at the Warbirds Event September 10th.

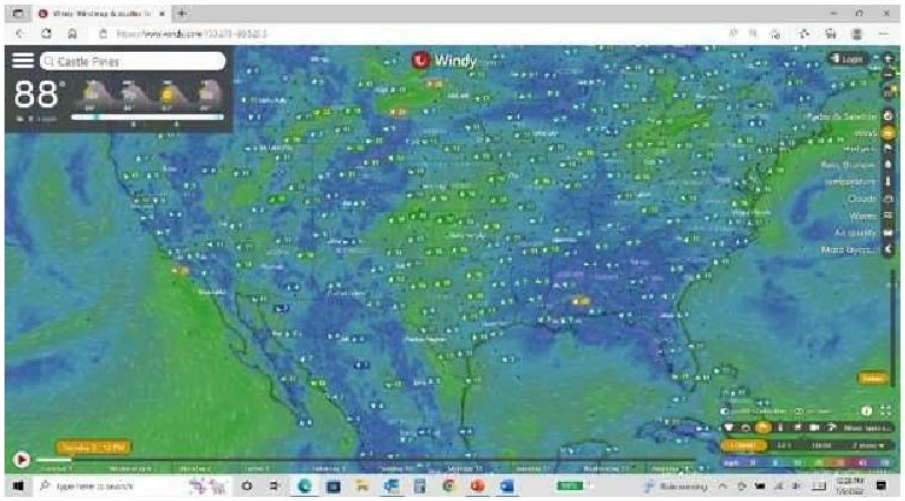
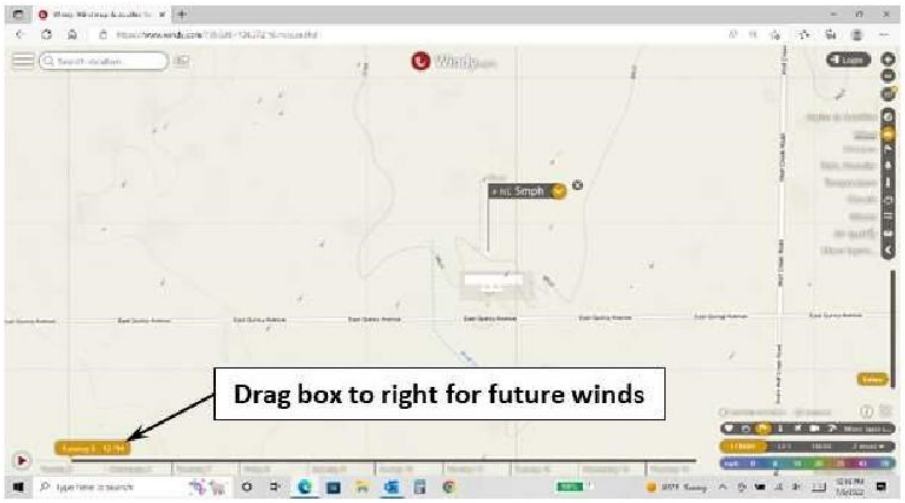
Wind Forecasting at Mile Hi International

If you haven't tried the windy.com website yet, give it a peek. Winds have the biggest impact on flying our models and this tool is great for seeing what's coming.

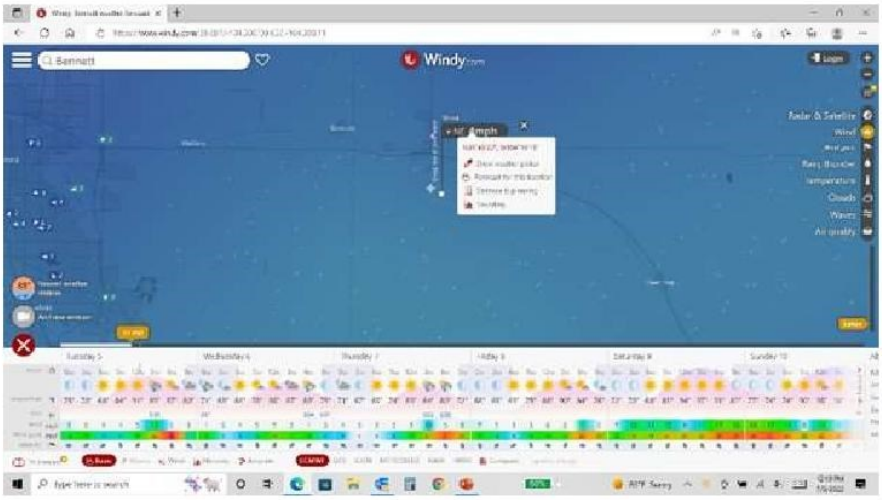
The basic website starts by showing winds across the whole country. A quick glance shows the flows across the continent. You can see frontal activity just by looking at the wind vectors. Now using the mouse, zoom the map to the place you want to know more about.



Zoom to the location of our field and there's the club airstrip in all its glory! Left-click on the map next to the runway and up pops a wind flag. Drag the time/date box on the bottom of the screen to look into the future for the location you selected. The wind flag updates as the time changes.



Right click on the wind flag and select ‘forecast for this location’ and up pops key conditions on the bottom of the screen including – date; time; temperature; sky condition; precipitation; wind speed; direction and gusts for the next six days for the location you selected.



Other weather can be pulled up as well on the right side of the screen. Play with it for ten minutes to get a feel for what the tool can do. This has been my go-to site for model and full-scale flying weather for several years. I really like it!
